

BLOCKCHAIN POWERED PLATFORM FOR TRADE AND FINANCE

For Global trade and finance and asset tokenization of infrastructure

Consortium led governance makes it truly decentralised

TradeFinex is a consortium owned hybrid blockchain platform by XinFin for the development of IAC i.e. Infrastructure as an Asset Class which enables crowdfunding through asset tokenisation. TradeFinex aims to minimize global infrastructure deficit by enabling retail investor participation and increasing efficiency through work stream automation. Consortium led governance makes it truly decentralized which is in sync with core philosophy of blockchain. XinFin aims to bring together Financier, Beneficiary, Supplier, Regulators, Government and Institutions in a seamless ecosystem.

TradeFinex helps buyers secure capital at globally competitive rates, gives suppliers visibility on global tenders & customer base and provides financiers real time visibility on their investments. Buyers and Sellers can enter in to an escrow smart contract over Blockchain thereby minimizing role of intermediaries. Governments, Institutions and communities can raise finance, specifically for critical public infrastructure projects that the government needs to undertake for economic well-being of the citizens.

CREATE YOUR SMART CONTRACT WITHOUT CODING

Now, create your smart contracts for token and asset tokenization without any programming expertise in less than 5 minutes.

With MyContract.co, individuals and businesses can now build their own token smart contracts in minutes. An automated smart-contract or coin-creation contract app, MyContract will initially allow contract creation on Ethereum public chain with any of the ERC standards including ERC 20, ERC 223, ERC 721, ERC 888.

Payable in XDCE tokens, MyContract.co's enterprise version will allow businesses deploy their own smart-contracts across industries like Supply Chain, ERP, Decentralized Credit, Closed Ecosystem Wallets with creation of private network on XinFin network by staking XinFin's native fuel called XDC.

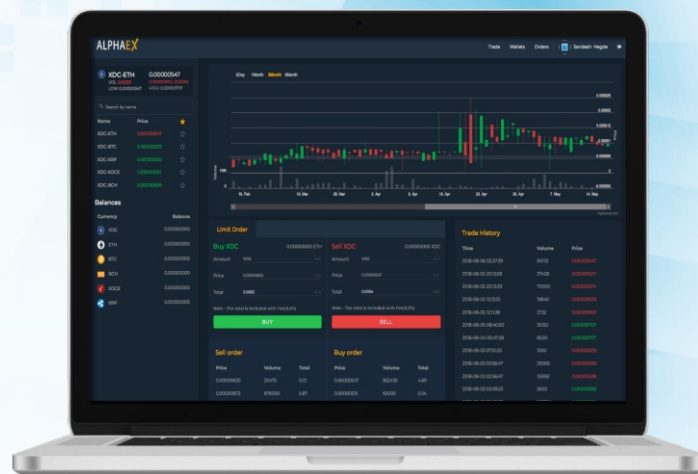

MyContract.co will provide hybrid bridge access to enterprises which enables them access all kinds of applications through Open restful APIs and connects them with other XinFin Network based private chains or Ethereum based smart-contracts or assets.

The benefits of creating your own smart contracts or coins include:

- Lets you create your own crowdfunding contract or token
- Lets an individual digitize any kind of asset
- Hands-on is the best way to get started with Blockchain education
- MyContract.co can handle any kind of asset class, houses, cars, community coins, digital art, bonds, dividend instruments
- Keeping personal financial data like KYC or credit score locked with a secure private key
- First step towards financial independence

ALPHAEX

DIGITAL ASSET EXCHANGE FOR TRADING OF CRYPTOCURRENCIES & OTHER DIGITAL ASSETS

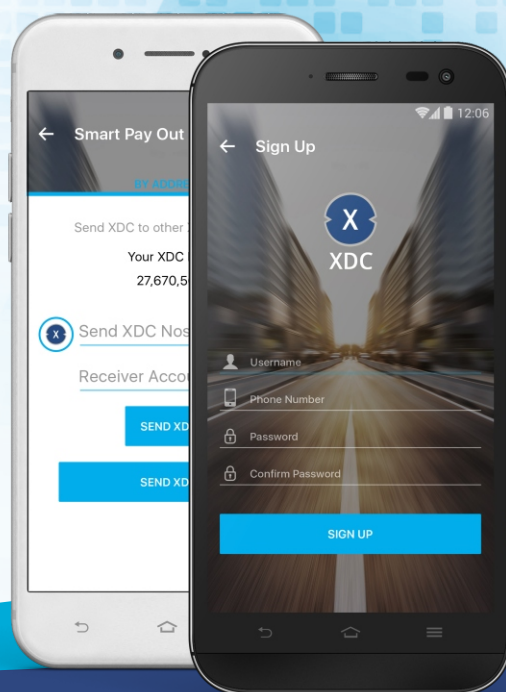

AlphaEx is a very robust set of applications. It matches orders between buyers and sellers in a highly secure environment, allowing for throughput of multiple transactions per second with powerful security and risk controls.

The core of AlphaEx is highly optimized, its performance rivals that of the busiest crypto exchanges. The complete solution can be a White Label Crypto Exchange - that you can host, using your own domain name, and you can create your User Interface. Lightweight and highly functional crypto exchange platform (Fully compatible with smartphones) corresponds with easy-to-see chart display and other currencies beyond bitcoins realize scale-out using cloud platform and container virtualization technology.

Currently XDC is the only token/coin traded on the platform. It can be traded against all major cryptocurrencies like Bitcoin, Ether, Ripple & Bitcoin Cash.

The Daily volume of XDC is around 15-20 Million and Alphaex has around 10,000 active users trading on Alphaex platform.

XinFin's XDC FIAT Value and Multicurrency Blockchain Wallet With Multisig Support is Built For Mainstream Enterprise Adoption

Powered by XDC Protocol, XinFin's XDC Wallet is first-of-its-kind blockchain-based Multisig, Multicurrency Wallet supporting FIAT transactions on Hybrid Blockchain Technology.
